Document name: Third press release

August, 27th 2021
Press Release

University of Niš has organized Short-term joint staff training event as part of MIND project funded by European program Erasmus +

University of Nis as a partner of the Project MIND - Development of Mechatronics skills and innovative learning methods for Industry 4.0 organized short-term joint staff training event in Niš, Serbia from 25th to 27th of August 2021.

The event took place at Faculty of Mechanical Engineering University of Niš. At this training event, 15 teachers from 3 MIND University partners were involved (UTCN, PUT, UNI). MIND University partner from Slovakia, STU was unable to send teachers to this event due to COVID 19 restrictions for traveling abroad.

The main objective of C1 short-term joint staff training event was to put in action and test 2 learning modules, one per each day and how to apply new modules lessons to the classes.

UNI representatives have presented all novel accredited subjects on Mechatronics and Control M.SC study program and on Mechanical Engineering – module Mechatronic and Control B.Sc. study program. Also, completely new module on Engineering Management M.Sc. study program named Management in Industry 4.0 have been elaborated.

Modernization of these modules, new subjects related to Industry 4.0 and accreditation of the one completely new module can be considered as very important achievements of the MIND project.
